Determine *all* possible sources then select best sources

E Synthesis

Organize from multiple sources/Present information/make a decision

F Use of Information

Engage (read, hear, view, touch) extract relevant Information

C You have decided to exercise more and want to begin bicycle riding. However, you do not have a bike. You've seen several styles and sizes at sporting good stores but do not know which one to purchase.

D You remember your friend just bought a bike and have seen advertisements in the local newspaper for new bicycles. You also have a smart phone with internet access.

A You ask a sales person at Bike Trax about frame sizes for your height. You perform a keyword search in Google for information on different bicycle features.

F You read several blogs and online forums about choosing a bike that's just right for you. You read a Consumer's Report guide on bicycles. You also take a bike for a test ride up and down the aisles at the local sporting good store.

E You find the style and color you like best in the correct size frame and pay for it with your EECU VISA.

B You take your new bike for a ride on the *Rails To Trails* trail. You're so happy with the decision made in making your purchase that you plan on going for a ride every evening.
